

What To Do If You're Involved In An Accident

Here is a list of 11 easy steps to remember, as compiled by the National Safety Council:

Stop your vehicle if it is clear, safe and legal.

Move the vehicle out the traveled roadway, if it is clear, safe and legal.

Turn off the ignitions of the cars involved.

Make a first aid check of all persons involved in the accident

Call the police and, if necessary, emergency medical services.

Mark the scene of the accident with flares or retroreflective triangles.

Gather the names of all persons in the motor vehicles and people who witnessed the accident.

Make a quick diagram of where the vehicle occupants were seated and indicate the vehicles direction of travel and lane. Also note the date, time and weather conditions.

Ask to see the other license of the other driver and write down the state and number.

Exchange insurance company information. DO NOT discuss "fault" or make statements

about the accident to anyone but the police.

Get a copy of the police report of the accident
from the local precinct or officer on the scene.

Get the accident report number.
